

AP Chemistry Photoelectron Spectrum Worksheet

Name: _____ Date: _____ Period: _____

1. Identify the peak that represents the 1s electrons: _____
2. Identify the peak that represents the outermost electrons: _____
3. Write the electron configuration: _____
4. Determine the element represented by the spectrum: _____
5. Calculate the kinetic energy of the outermost electron if the photon energy is 1800 kJ/mol:
KE = _____ kJ/mol

6. Explain why the 1s peak is farthest to the left: _____

7. Short response: _____

8. Question or extension: _____
